The trouble started in the throwing of one or two stones and the boarding of the freight by men who set the brakes and broke it into three sections. The reight now blocks the main line and the progress of the mails. The railroad officers declared tonight that the incident was the work of strike sym-athizers, while a county official wired the governor's office that it was mere-ly an accident.

Mortally Wounded.

Manila, May 28.—Two private soldiers were killed and a sergeant was mortally wounded during a fight with Moro bandits on the Rouman river. May 22, according to advices received there today. The Moros surprised an outpost of the Eighteenth infantry encamped near Keithley and poured a voiley into the soldiers before the latter could defend themselves. The two privates were killed instantly by the first shots fired. Two columns of infantry are in pursuit of the bandlits.

The detachment that was attacked had been engaged in protecting friendly natives, inducing them to cultivate the land, and had introduced the double sentry system as a precautionary measure, as allacks were expected momentarily from the toving bands of marauders that infested the country.

Manila, May 28.—Two private soldiers beginned and that the should have adjourned over until Tuesday, as a resolution was adopted four months ago specifying Tuesday, Wagnesday, and Thursday as sitting days, and that therefore any business transacted on any other day would not be valld. This belief doubtless accounted for the small number present today.

For a half hour or more this morning prior to 11.20 the question was again under discussion by a group of members and Clerk Blodgett. Mr. Blodgett contended thet the error of the speaker was purely technical and today the house would have a perfect right to do business, as it is a law on the country would in the should include Friday as a sitting day. (Special to The Bulletin.)

Hartford, May 28.—For three days the senate and four days the house have been in session this week, and not a single thing accompilished; and here it is the first of June. To be sure, the session of Thureday announted to mothing in the way of transaction of business, but the house got nowhere on the other days and the senate has got to a point where few measures are on its calendar, and it is—well, not exactly waiting on the house, but undobutedly slowed down because of the delay in the lower body. Any talk of an effort on the part of the senate to get the house to hurry or any action looking to bring the house up with a sharp turn is nonsense, however.

It is out of the question that this should be done, especially as there is no practical way of doing it. The house can dilly-dally as long as it wishes and the senate will merely have to grin and bear it, Governor Weeks is likely to send in a special message erelong, asking the house to try to expedite matters a bit, for the chief executive is getting weary of the way affairs are going, but it is question. thorities will attempt to clear the track at Lithonia for the mail trains early tomorrow, and that the deputies will be used to protect the train crews in clearing the track. pedite matters a bit, for the chief executive is getting weary of the way affairs are going, but it is questionable how much good that would do. The trouble is that the house is more thoroughly unorganized than has been the case in any session in recent years. There is no machine and no real leadership. Since it has tasted blood by way of turning down the judiciary committee's reports and found it possible t defeat the wishes of Leader Burnes, there seems to be a huge delight in running away with the recognized house leaders and doing about as the whim of the moment dictates. There is, then, a tacit con-flict between Connecticut, which defilet between Connecticut, which desires to keep what it has and get more, and Massachuset's, which desires to regain somethin it had and get more, mixed up in the matter. But the house, many of whose members are very familiar with all this, simply runs away with the bill and starts amending it into a condition where the man who into a condition where the man who drew it wouldn't recognize it. Persistence Is Business At High Pressure

Persistence in business is a prime qualification. It does not wait for customers to drop in, but it drives them up. It underlies all competition and represents the pushing spirit of trade. It was illustrative of persistence when the inquiry was made "When should a man advertise?" and the printer replied: "All of the time!" This is the time to advertise. Keeping everlastingly at it is the price of success. Publicity is good to check irregularities in government and to exploit the most attractive bargains for the attraction of the people. It is not friendship that commands trade, but advantage—the bargain chaser never dies. That is why it will pay to advertise in The Bulletin with regularity, which means also at the rockbottom price. Postoffice inspectors and railroad of-ficers are convinced that in the arrests brought about by the pupils they have apprehended the train robbers. The chain of evidence aiready obtained is said by the police to be almost com-plete. Chief Briggs regrets that the fourth man escaped. There were but two officers to uttempt four arrests and their work was made difficult as the four men kept scattered while ap-proaching the point where the revol-vers and other tools were hidden.

The police made the arrests, but to the sharp eyes of schoolboys belong the credit of discovering the hidden tools of the robbers, thus bringing about the arrests of the suspects, and to the deductive reasoning of Mrs. Nora Freeman, a teacher, scores of detectives ascribe the finding of the robbers' loot in the attic of the schoolhouse today.

When schoolboys yesterday found hidden on the banks of the Missouri river revolvers, lights and other material used by robbers, they tool their teacher. Mrs. Freeman. She advised the police, and detectives, after a 20-hour vigil last night arrested the three men now in custody.
